STEP BY STEP

WINDOWS MEASUREMENT GUIDE

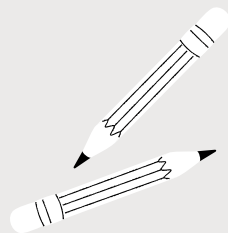

WHAT YOU WILL NEED

BEFORE YOU START

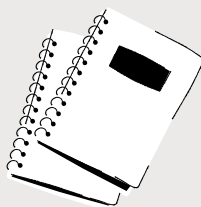

STEEL MEASURING TAPE FOR EASY MEASURING

You will need steel measuring tape to take accurate measurements.

PEN OR PENCIL TO WRITE THINGS DOWN

You will have to write down the measurements for each window in the worksheet.

WORKSHEET FOR YOUR CONVENIENCE

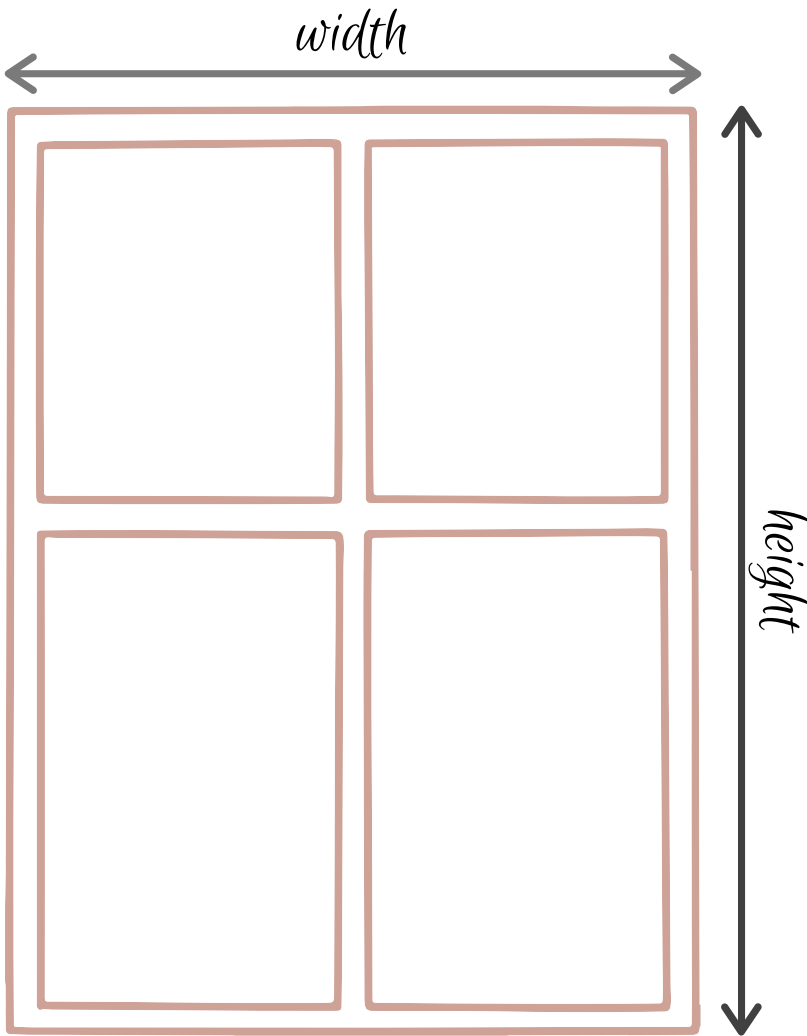

Feel free to use our special worksheet to write the measurements down.

SMART PHONE TO TAKE PHOTO OF EACH WINDOW

Remember to take photo of each window you measure and send it to us.

READY TO GET STARTED?

Please note: as the measurement are not exact they will only be use to calculate the quote. Once we have a mutual agreement a professional team will come to measure your windows for the manufacturing purposes.

HOW TO DO IT

STEP BY STEP APPROACH

01

MEASURE THE WIDTH

For the width measure the exact area from side to side. Please measure the whole window, including window frame. Even if your windows look the same to you, please take measurements of all windows in the room. Write your results in the worksheet or on a piece of paper and send them to us.

02

MEASURE THE HEIGHT

For the height measure the exact area from top to bottom. Please measure the whole window, including window frame. Even if your windows look the same to you, please take measurements of all windows in the room. Write your results in the worksheet or on a piece of paper and send them to us. Please take a photo of every window you measure.

03

SEND US THE RESULTS

Once you have all your windows measured and the results are written down, you are ready to send them to us. Please attached all photos of measured windows you took. Our specialist will prepare an approximate quote based on your measurement and contact you as soon as it is ready. Please don't hesitate to contact us at any stage of the process. We will be happy to help!
